

JOB DESCRIPTION

Intermediate Full Stack Developer

The company:

Joy Business Academy is a growing and ambitious studio striving to push the boundaries of lifelong learning. We use modern digital tools, game design techniques and innovative technologies to re-envision what learning can represent in a global, diverse, post-industrial world.

You'll be coming to a team with a strong sense of ownership and pride over their work, as well as one that is deeply attuned to creating positive social impact for a range of learning communities.

Sounds intriguing? Read up on what we're looking for and let us know if you are the one.

Your responsibilities: Disrupting the status quo of Education

(a.k.a what you can expect to do on a day-to-day basis)

What will you be doing?

You will be working alongside with another Senior Backend Developer and a Frontend Developer to make our platform even more kickass by implementing and deploying new features and functionalities.

You will also be refactoring our code base and creating unit testing to better secure our platform.....

Skills, Technical Knowledge and Qualifications?? Simple really....

Your Profile - Ready to play

We're looking for a Senior Full Stack Developer with at least five years' experience who ideally has a background in creating SaaS web applications with a strong focus on user experience and design.

Also:

- an extensive portfolio to share with us.
- BDD or TDD knowledge
- A passion for beautiful code.
- Ninja like reflexes with PHP (our platform is built on Laravel).
- hacking experiencing with React/Angular or Vue, HTML (duh!), CSS (duh!), MySql/Mongo.DB SQL.
- exceptional git skills.
-

Our Current Technology

The front-end of our platform mostly utilises HTML5 and CSS with Bootstrap as the basis for much of the responsive abilities. While there is some use of jQuery, we plan to move towards much greater use of a Javascript framework for our both the web platform and the course material itself. The primary platform runs off a PHP backend using the popular Laravel framework, all running on Amazon Cloud services running Ubuntu. Having been predominantly built by a third-party provider, there is a large scope for moving to new technologies as we add new features and develop the platform to scale.

We also utilise many development and deployment tools such as Git, Gulp, NPM and Composer.

We're a team passionate about creating positive social impact through interactive experiences and games. As such, it's important to us that our staff share the same passion and are advocates for the company values that dictate the way we operate.

Outgoing, with a warm personality

Technically savvy

An excellent communicator

Experienced at offering technical support

Able to show initiative, contributing to larger projects when needed

Experienced at using a CRM and ticketing software

Comfortable working independently

If this role sounds like your next opportunity, please send your resume, and an accompanying cover letter that includes:

Key relevant experience

Who you are and how you see yourself fitting into our team

If you have any questions or would like to get in touch, please contact Lauren Bardebes (careers@joybusinessacademy.com).

We are an equal opportunity employer and value having members that represent our global diversity. We strongly encourage any individual regardless of race, religion, colour, nationality, gender, sexual orientation, age, marital status, or disability status to apply for this role.

Applicants for this position should have NZ residency or a valid NZ work visa.
